

PRESS RELEASE

Dr. Volker Probst appointed Chief Technology Officer (CTO) of Johanna Solar Technology GmbH

Oldenburg/Brandenburg, 20.06.2008. Yesterday, Dr. Volker Probst was appointed CTO of Johanna Solar Technology GmbH. This was announced by Marius Eriksen, the chairman of the advisory board. Dr. Probst is a proven expert for thin film technologies and disposes of long-standing, practical experience in the development, implementation and application of CIGS-technologies in the PV industry.

The company

Johanna Solar Technology GmbH

Johanna Solar Technology is a world renowned leading manufacturer of state-of-the-art thin film solar modules. These high performance modules convert the sun's energy directly into electricity. They are based on copper, indium, gallium, sulphur and selenium – known in short as CIGSSe. The nominal capacity of the first phase of the production plant in Brandenburg/Havel is 30 MW. Just in this phase alone Johanna Solar Technology has created more than 200 jobs. A major shareholder in Johanna Solar Technology is the publicly quoted aloe solar AG, holding a 19% share.
